

▪ **SEROPHENE® Discontinuation NOTICE**

Dear valued Health Care Professional,

Ensuring sufficient supply of our products to patients through pharmacists and physicians is a priority for EMD Serono. Therefore, we would like to inform you that we are discontinuing Serophene® (Clomiphene Citrate tablets, USP 50 mg) from the Canadian market.

This decision was made due to some ongoing technical and supply issues with our manufacturing partner, which will lead to a stock-out in Canada occurring around June 2017. As this situation significantly affects EMD Serono's ability to guarantee supply reliability for Serophene®, we have decided to discontinue the product from the market, with the best interest of our patients and physicians in mind.

If you have any questions, please contact us at:

Product	Dosage	DIN	UPC
Serophene®	50 mg	00893722	7 72619 11030 1

Serophene® (Clomiphene Citrate tablets, USP 50mg) is indicated in the treatment of ovulatory failure in patients desiring pregnancy, whose partners have adequate sperm and who have potentially functional hypothalamic-hypophyseal ovarian systems and adequate endogenous estrogens. Impediments to this goal must be excluded or adequately treated before beginning therapy.

Please see prescribing information for full indication, contraindications, warnings, precautions, adverse events and dosing information.

EMD Serono is a business of Merck KGaA, Darmstadt, Germany.
